

ACCESS19

PROTECT YOUR WORKFORCE FROM COVID-19

Through IntelliCorp's parent company, Cisive, our ACCESS19 solution is a secure, paperless, safety solution specifically designed to allow businesses to resume day-to-day operations while keeping their workforce safe from COVID-19. With rapidly changing conditions, Cisive's solution allows organizations to maintain a safe workplace via ongoing monitoring and daily COVID-19 attestation and status validation.

BENEFITS

1. Ensures Safety

Keep your employees or students safe from COVID-19 with our flexible, data-driven solution that can evolve as vaccines and various testing options are approved by the FDA.

2. Protects Privacy

ACCESS19 protects public health data and eliminates privacy concerns.

3. Minimizes Risk

Our solution provides attestation digital badges valid for 1 day, which expire at midnight. Minimizes the risk of COVID-19 by limiting access to your organization without daily attestation.

KEY FEATURES

Secure Badge Immunity Verification

ACCESS19 generates a digital badge that requires employees to provide COVID-19 self attestation each day before returning to work, providing care, and so forth.

Technology-Enabled, Full-Service Solution

Safeguard your organization with our easy-to-use system that offers reporting capabilities and is backed by a dedicated service team ready to support your organization.

Customizable to Your Organization's Model

While ACCESS19 is designed to help you easily manage COVID-19 at your organization, our standard set of questions can be fully customized to meet your policies and protocols.
