IntelliCorp Announces Advanced Drug Screening Solution for Background Screening

BEACHWOOD, Ohio, May 7, 2019 — Intellicorp Records, Inc., a Verisk (Nasdaq:VRSK) business, announced today an advanced drug screening solution integrated into the company's background check ordering process. IntelliCorp is an award-winning provider of employment and volunteer screening services for businesses and nonprofit organizations.

Employers can now help manage their drug screening and background check program from a single platform. Through a simple scheduling widget, customers can easily order drug screens, be informed when a sample is collected, and receive real-time status updates. Additionally, should a change in a candidate's status occur, the client automatically receives an e-mail notification. This is highly beneficial for knowing a candidate's status in the drug testing process.

Clients can also benefit because the advanced drug screening solution is available through the company's mobile self-service candidate portal. Using this medium, the candidate can enter the information for the background check and schedule a drug test from their preferred mobile device, creating a streamlined and optimal user experience. It also includes e-signature capabilities for disclosure and authorization forms.

"This solution provides a one-stop shop through the IntelliCorp website, which includes the ability for clients or the candidate to schedule the drug screen at the time of order placement," said Todd Carpenter, IntelliCorp president. "Drug testing can often be overlooked. However, our simple interface allows employers to easily order, manage, and track drug screening and background checks from one convenient online location. It also includes digital signature capabilities for addendums and document storage for future retrieval."

IntelliCorp's advanced drug screening solution is available nationwide and can be accessed 24 hours a day, 7 days a week. Some of the company's drug testing products and services include hair, saliva, urine, DOT electronic scheduling, random, MRO (Medical Review Officer), post-accident, and on-site testing. IntelliCorp provides value to clients through superior service, compliance, quality data, and secure technology solutions. To that end, IntelliCorp was named number one on *HRO Today* magazine's 2018 Baker's Dozen list of the nation's top midsize-program screening providers and the leader in the Quality of Service category.

**About IntelliCorp**
